All-Rounder:

ERV expansion joints with PTFE lining, for all media.

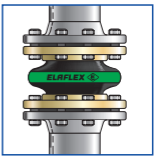

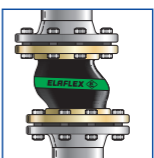

For pipe construction, you will need compensators – to absorb thermal expansion, to reduce vibration and noise.

ERV rubber expansion joints have reliably performed these tasks for more than forty years. Due to premium ELAFLEX/Contitech quality and fast worldwide delivery service they have become the industry standard.

Out of nine different types, we can assist you to make the right choice for your application. If you should need a true 'all-rounder' for extreme services, our expansion joints are also available with an additional PTFE lining.
