

# Many Options, Quick Choice.

[http://  
ervconfigurator.elaflex.de](http://ervconfigurator.elaflex.de)

ELAFLEX 'ERV' premium quality rubber expansion joints are suitable to absorb vibration and noise and compensate movements within pipework systems.

Bellows type, size and length, flange standard and material, accessories: There are several options to choose. Our new ERV Configurator simplifies this task.

With a few clicks, the required expansion joint is built – with correct order number, a photorealistic picture and corresponding data sheets.

Please have a try!
