

Elaflex SSE Teflon PFA coated stainless steel couplings

they are reliable, leak-proof and operationally safe.

Elaflex is also expanding its cryogenic product range. Besides the established MannTek products (dry cryogenic and breakaway couplings) the company will showcase the newly developed LNG composite hose Elaflex Cryo.

Elaflex will be exhibiting in hall 8.0, booth L 93.

> Elaflex: hose assemblies for the chemical and pharmaceutical industries

Elaflex provides standardised hoses and couplings for the transfer of dangerous goods and sensitive fluids –all from a single source.

At Achema 2018 the company will be displaying its hose and coupling equipment as well as product novelties.

In addition to PTFE-lined ELAPHARM pharmaceutical hoses, the new ElaSil silicone hose range is also available. ElaSil conforms to FDA and USP Class VI and meets the 3-A Sanitary Standard. The hose sizes DN 13-102 mm are assembled to customer specification, with crimped couplings.

The Camlock product range from our own Elaflex production has been supplied since 2016. Stainless steel

ElaSil hoses with a variety of couplers

female couplers are also available now in EASYLOC version with automatic lever lock to avoid unwanted disconnection during operation, due to excessive pulsation for example.

Elaflex says that all its Camlock couplings are guaranteed to EN 14420-7;

Elaflex Easyloc one-hand lever
