

Configurator for the Mann Tek Product Range

Elaflex continue to improve their interactive service for customers. Hose assemblies, expansion joints and nozzles can be configured online – with a multitude of options and accessories – and saved locally, or sent as an inquiry for quotation. The Elaflex product configurators are designed to be user-friendly with the customer in mind. Customer feedback is positive confirming its informative, easy and fast to use.

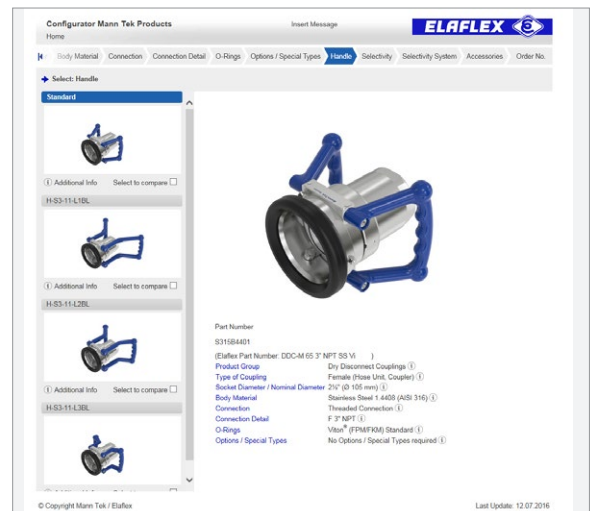

In July 2016, our new configurator for the Mann Tek product range was launched. Mann Tek, Sweden is part of the Elaflex group, and develops and supplies Dry Disconnect Couplings for clean, safe and spill free handling of fluids, gases and bulk powders.

<http://manntekconfigurator.elaflex.de>

The new online tool offers all types of dry disconnect and safety breakaway couplings as well as cryogenic version, ball valves and swivel joints, in a wide range of sizes, materials, options and accessories:

- DDC (Dry Disconnect Couplings)
- DAC (Dry Aviation Couplings)
- DGC (Dry Gas Couplings)
- DCC (Dry Cryogenic Couplings)
- SBC (Safety Breakaway Couplings)
- CBC (Cryogenic Breakaway Couplings)
- FFBV (Full Flow Ball Valves)
- SJ (Swivel Joints)

It provides purchasers, consulting engineers and end users a time saving and easy to follow information and quotation platform – without the need for reading and comparing data sheets, catalogue pages, brochures etc. The configurator makes it possible to combine and visualize the required coupling.
