

# Safe handling of liquids and gases – ELAFLEX at Fuel & Gas Logistics 2024

**Hamburg, Leipzig, September 2024 – ELAFLEX Group will be presenting products and solutions for the safe and efficient handling of conventional and alternative fuels from 22 to 24 October at 'Fuel & Gas Logistics 2024' in Hall 2, Stand G05/H06 at 'Leipziger Messe' fair ground.**

For ELAFLEX, it is a logical step to be an exhibitor at the premiere of 'Fuel & Gas Logistics 2024', as the ELAFLEX Group was already present at its predecessor 'expo PetroTrans' from the very beginning. In conjunction with the 'GGG Fachmesse Gefahrgut // Gefahrstoff' trade fair – which takes place at the same time in Leipzig – 'F&GL' covers exactly ELAFLEX Group's key areas of expertise. For decades, ELAFLEX has positioned itself in the market as a leading specialist for refuelling and handling technology for land, water, rail and air vehicles and also provides extensive expertise and experience for over-coming the challenges arising from the energy transition.

ELAFLEX also invites all visitors of the 'GGG Fachmesse Gefahrgut // Gefahrstoff' trade fair to stop by at stand G05/H06. Among other products, the following proven and innovative solutions await interested trade visitors:

- ELAFLEX DualSafe – newly developed, double-walled hose assembly solution with integrated leak prevention technology from SGB
- Hose reels made to customer specifications for handling and refuelling different media
- Components for safe and fast transport/handling of H2, LH2, CNG, LNG, LPG and conventional fuels
- New DDC 2.0 dry disconnect couplings and semi-automatic pneumatic nozzles for LH2 from MannTek

## About ELAFLEX Group

**As a solution provider, ELAFLEX Group specialises in the development, manufacturing, distribution and maintenance of handling and refuelling technology for hydrogen, CNG, LNG, LPG and conventional fuels and chemicals. As an internationally active family business, we have been setting cross-industry standards in terms of durability, quality, safety, sustainability and total cost of ownership (TCO) for more than 100 years. The constant and trusting dialogue with our customers allows us to combine ecological and social responsibility, innovation leadership and user-friendliness of our solutions. ELAFLEX, Dantec, ditec, MannTek, Oasis and SGB always consider the path of sensitive media from production or extraction to the end user as a whole and optimally harmonise all components involved.**
