

Focus on the potential of LPG – ELAFLEX at LPG Week 2024

Hamburg/Cape Town, October 2024 – ELAFLEX Group will be presenting products and solutions for the safe and economical handling of LPG, DME and their mixtures at LPG Week 2024 from 18 to 22 November on stand A8/A9 at the Cape Town International Convention Centre (CTICC).

Liquid Petrol Gas (LPG/Autogas) plays in Africa an important role for heating and cooking appliances in households. At the same time, its high energy density makes it suitable for converting motor vehicles. As with all conventional and alternative fuels, great attention must be paid to safety, environmental compatibility and user-friendliness when handling LPG. As a leading international specialist in refuelling and handling technology for land, water, rail and air vehicles, ELAFLEX has been positioning itself on the market for many years with reliable, durable and cost-effective solutions and products for the special requirements of LPG, DME (including derived mixtures), CNG and hydrogen.

At LPG Week in Cape Town from 18 to 22 November, trade visitors can inform themselves about the following solutions and products at the ELAFLEX stand A8/A9 in the CTICC:

- Safe and user-friendly LPG/Autogas refuelling solutions for all connection variants used worldwide
- Proven, reliable equipment for handling LPG, DME and derived mixtures on an industrial scale
- MannTek's market-shaping dry and safety couplings to prevent environmental/personal damage and product loss when handling sensitive media
- Future-proof solutions for the transfer of cryogenic, liquefied or highly compressed alternative fuels such as CNG or hydrogen

About ELAFLEX Group

As a solution provider, ELAFLEX Group specialises in the development, manufacturing, distribution and maintenance of handling and refuelling technology for hydrogen, CNG, LNG, LPG, conventional fuels and chemicals. As an internationally active family business, we have been setting cross-industry standards in terms of durability, quality, safety, sustainability and total cost of ownership (TCO) for more than 100 years. The constant and trusting dialogue with our customers allows us to combine ecological and social responsibility, innovation leadership and user-friendliness of our solutions. ELAFLEX, Dantec, ditec, MannTek, Oasis and SGB always consider the path of sensitive media from production or extraction to the end user as a whole and optimally harmonise all components involved.
