

ELAFLEX Group will be present at the premiere of the trade fair ETX – The Energy Transport Exchange 2026

Hamburg/Kassel, August 2026 – from September 17–19, ELAFLEX Group will be presenting products and solutions for the safe and cost-effective handling of conventional and alternative fuels at “ETX – The Energy Transport Exchange” at booth C03 in Hall 4 of the Messe Kassel trade fair grounds.

The newly conceived international trade fair for the logistics of petroleum, gas, and energy sources focuses on the topics of transportation, technology, telematics, infrastructure, and regulation along the entire value chain of sustainable energy and logistics processes. This focus was the key factor in the ELAFLEX Group’s decision to participate with a booth at the fair’s premiere—the globally active group had already been present at PetroTrans and Fuel & Gas Logistics. For decades, ELAFLEX has positioned itself in this demanding market as a leading international specialist in refueling and transfer technology for land, water, rail, and air vehicles. The company combines extensive expertise and experience to successfully address the complex challenges of the energy transition.

Among others, the following proven and innovative solutions await interested trade visitors at booth H4-C03 in Hall 4:

- DualSafe – a double-walled ELAFLEX hose assembly solution with leak monitoring technology from SGB
- Custom-made hose reels designed to meet specific customer requirements for various refueling and transfer scenarios
- New DDC 2.0 dry disconnect couplings and semi-automatic pneumatic nozzles for liquid hydrogen (LH2) from MannTek
- Components for safe and efficient transport and handling of H2, LH2, CNG, LNG, LPG, and conventional fuels

About ELAFLEX Group

The ELAFLEX Group is a globally leading specialist for the transfer of liquids and gases, developing and distributing solutions for handling of conventional and alternative fuels as well as chemicals. Today, ELAFLEX stands for cross-industry standards regarding safety and quality for already more than 100 years. The unmatched quality of the user-friendly products is based on durability, sustainability, reliability, and results in a low Total Cost of Ownership (TCO). As a global system provider, the ELAFLEX Group combines decades of expertise and innovative strength along the entire transport chain. Aljac, Dantec, ditec, ELAFLEX, MannTek, Oasis and SGB always consider the path of sensitive media from production or extraction to the end user as a whole and optimally harmonise all components involved.
